

Stover Field Mover

Simple Operation

1. Back up to round module
2. Arm engages module
3. 3 point raises module
4. Form a line of 4 modules for transport
5. Unload module

Advantages of Stover Module Mover

- Allows you to pickup round module in the field without crossing rows
- Cotton stalks are not grabbed when loading the module
- A smaller tractor can be used than with other movers
- Tractor driver can easily determine correct spacing of modules
- Ability to haul round hay bales
- 3 point hitch
